

HAND SANITIZER

HAND SANITIZER

In these times when hygiene requirements must be strictly adhered to by everyone, you want your employees and customers to be able to scrupulously follow the rules.

That's why matteo is now launching the Safe@Work hand sanitizer. This disinfecting gel is perfectly suited to guarantee hand hygiene in department stores, catering establishments, workshops and at the office or at your home.

Our hand sanitizer is produced in Belgium and contains 75% ethanol. This makes it an effective means to clean hands without water and soap. The gel is available in 100, 250, 500 and 5000 ml. Each package already contains a ready-to-use liquid that should be used undiluted.

Always carefully read the instructions for use and the safety data sheet before use.
